Hello, I'm your assistant, how can I help you?

2. Which historical development in 1973 fundamentally changed how computers could be interconnected? a) The invention of UNIX operating system b) Development of DRAM by Intel c) Robert Metcalfe's development of Ethernet d) The creation of the floppy disk

The correct answer is c) Robert Metcalfe's development of Ethernet.

According to the provided context, "1973 : Robert Metcalfe, a member of the research staff for Xerox, develops Ethernet for connecting multiple computers and other hardware."

Ethernet was a fundamental innovation that allowed multiple computers to be connected and communicate with each other, revolutionizing the way computers could be interconnected.
