🤖 Hello, I'm your assistant, how can I help you?

4. In the context of early computer development, what was the primary motivation for creating ENIAC? a) Business automation b) Scientific research c) Census tabulation d) Military calculations

🤖 According to the text on page 12, ENIAC (Electronic Numerical Integrator and Calculator) was built in 1946 by J. Presper Eckert and William Mauchley at the Moore School for Engineering of the University of Pennsylvania. The primary motivation for creating ENIAC was:

d) Military calculations

ENIAC was initially designed to calculate artillery firing tables for the United States Army during World War II. It's considered one of the first general-purpose electronic computers, and its development marked a significant milestone in the history of computing.
